

Candle-Based Entry Engine (Locked Strike)

Objective

After the strike is selected, the strategy **locks the strike** and waits for the **option contract's candle** to close.

The sell price is calculated from the **closed candle's Close price**, not the live Ask price.

Trading Flow

↓
Place SELL Limit

Example

Selected Strike

Expiry
31-Jul-2026

CE

25250

PE

25050

These strikes remain fixed until the trade is complete.

CE Candle

Time
10:15

Open = 12.10

High = 12.60

Low = 11.90

Close = 12.40

Configured

Offset = 1.00

Bot calculates

SELL

12.40 + 1.00

=

13.40

Submit

SELL LIMIT

13.40

PE Candle

Open

11.50

High

11.90

Low

11.20

Close

11.80

Configured

Offset

1

Bot

SELL

12.80

Important Rules

Strike Lock

Once selected

25250 CE

25050 PE

Never change strike because of market movement.

Only after the position is fully closed may the strategy perform a fresh strike selection.

Candle Reference

Always use

Close Price

Never use

Live Ask

Live Bid

LTP

for calculating the initial sell limit.

Multiple Candle Timeframes

Supported

15 Seconds

30 Seconds

1 Minute

3 Minutes

5 Minutes

Recommended

1 Minute

Sell Formula

SELL PRICE

=

Closed Candle Close

+

Configured Offset

Example

Close = 12.40

```
Offset = 1.00
```

```
SELL = 13.40
```

Re-Quote Logic

If the sell order is not filled within the configured timeout:

```
Pending Order
```

```
↓
```

```
Cancel
```

```
↓
```

```
Wait for NEXT Candle Close
```

```
↓
```

```
Read NEW Close Price
```

```
↓
```

```
Calculate NEW Sell Price
```

```
↓
```

```
Place NEW SELL Order
```

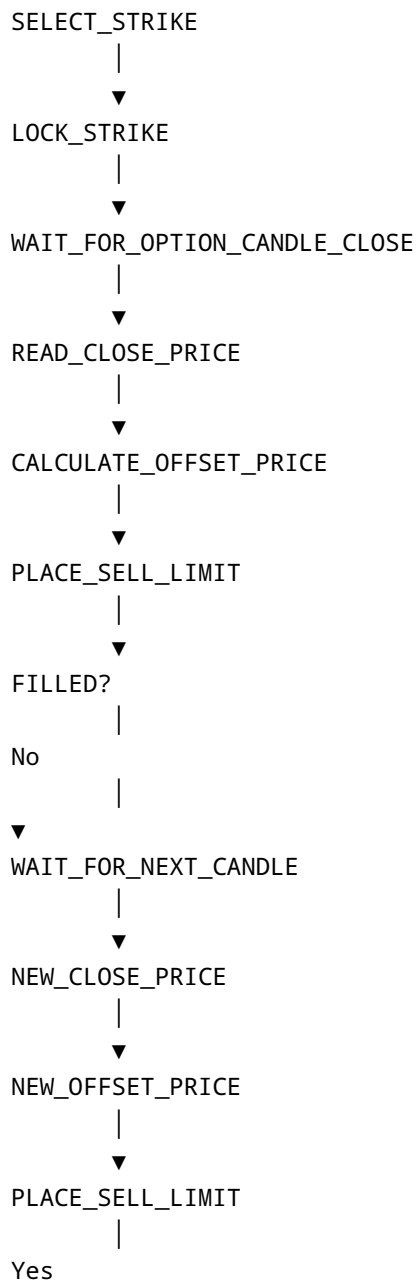

Do **not** modify the order every tick. Recalculate only after the next candle closes.

Configuration

```
{  
  "entryMode": "CANDLE_CLOSE",  
  "candleTimeframe": "1m",  
  "priceSource": "CANDLE_CLOSE",  
  "sellOffset": 1.0,  
  "reQuoteOnNextCandle": true,  
}
```

```
"lockStrike": true,  
"useLiveAsk": false,  
"useLTP": false  
}
```
